

General Information

The Rotorua District Council provides and maintains a range of open spaces, gardens, parks, amenities and facilities that are appropriate to the needs and enjoyment of the community whilst ensuring the beautification of the district and protection of the environment.

The area of Council reserve land in the district is approximately 800 hectares. Reserves are managed according to use, demand and type of reserve. Management plans are developed to show Council's policy and future proposals for each reserve or reserve group. There are approximately 110 urban reserves which are utilised by residents and visitors to Rotorua.

Management

The majority of reserves in and around Rotorua are managed by Rotorua District Council's Parks and Recreation Department. Council are responsible for maintenance of these areas, including mowing, trees, fencing, signs, playgrounds, toilets, etc. Council also does field renovation work, putting up and dismantling of goal posts for various sporting codes, marking sports fields, field hireage and any other associated work required to ensure that the reserves and sports fields are kept in their best condition.

Further Information
